

# WEST SIDE IBEX PASS

This map shows the east boundary of the Saddle Peak Hills Wilderness Area.

This area is listed as being off limits to all personnel and communications teams affiliated with the 2007 Baker to Vegas Challenge Cup Relay Race.

As you can see the boundary for the wilderness area parallels Highway 127. Teams wishing to place communications installations between the wilderness boundary and the Highway should stay within a 300 foot zone from the shoulder of the highway.

This will allow a limited number of teams to set up portable communications along the west side of the highway.
